

How to trade on Double Edge

A new DEX that stands out like a skyscraper in the clouds is NOW ready! Check out the 0,35% flatrate for every swap! Here is how you do it:

- 1.) Go to <https://double-edge.net/>
(Doublecheck the URL, it must be a „https“ – that ensures you are on the encrypted/safe version of the website)
- 2.) Watch our nice intro video on the website or directly switch your attention to the following part:

- 3.) Click on the „Connect Wallet to Swap“ button
- 4.) A small window pops up and you are now able to chose which wallet you want to connect to execute the swap.
(If you don't have a wallet yet, you can open one from the options given)
- 5.) Now pick the tokens you want to swap by clicking on the token drop down menu

- 6.) Add the amount your want to swap in the Buy or Sell space and click enter

- 7.) The DEX engine will then connect to the 13 DEX liquidity partners and search for the best buy/sell ratio.
(That also guarantees the best possible price at every given moment!)
- 8.) When you have entered all details you simply click the „Submit Swap“ button at the bottom.
- 9.) Congratulations! The swap gets executed and you will soon see the transaction in your wallet.

More info about our backend and liquidity partner Totle:

(An excerpt from their medium page:)

KYC/AML & Trust

With Totle, **none of our exchange partners require KYC/AML processes at this time.** Tokens never touch any of Totle's wallets or exchange wallets while trading, so **you never need to trust Totle** in a transaction. In any other scenario, **users must trust the exchange provider** every transaction they make.

We're working actively with lawmakers and legal providers to stay abreast of changing regulation and educate our way towards to most transparent and free future possible.

Our Partners

We DO NOT hold your assets, we DO NOT ask for your keys!

There are many, many crypto assets that involve high volatility. This can be good or bad depending on perspective. Users must exercise due diligence in deciding what crypto assets to acquire.
